## BRIEF INTROUCTION

Foshan Topone Electrical Appliances Co.,Ltd. founded in 2008, is now located in Xingtan Town, Shunde District, Foshan city, Guangdong Province, China, is a manufacturer dealing in research and development, manufacturing, sales of food dehydrator and commercial kitchen appliances, covering the production area of 5000 square meters, with the perfect factory and its own hardware workshop.

In the past 12 years, Topone has created a series of high-quality, cost-effective, durable and easy-to-use stainless steel food dehydrators, with the completely independent intellectual property rights and a number of inventions and utility model patents.

To enable our esteemed customers to win out amongst the business opportunities, Topone invests more than 6% of its turnover in R&D every year in constantly enhancing the competitiveness of the products, including the research and development of the latest technology of the products.

# INTRODUCTION

In order to match with the strategy of globalization of Topne , we started to provide high-quality ODM services to foreign customers in 2013, and have become strategic partners with many well-known kitchen appliances brands worldwide.

"Quality First, Keep Improving" is the quality policy of Topone, let users achieve the best experience is our eternal pursuit! All the series products of Topone can pass any stringent test standards in the world, and have been verified by

Web: www.topone-kitchen.com

Design-Topone design team with rich experience, provide global customers excellent product solutions of product function, structure, hardware software development, testing and engineering service in kitchen appliances at their best reasonable cost. It could meet customers' specific needs on the basis of design and manufacture craftsmanship combination.

Manufacture-Topone execute the whole production process according to ISO9001 quality control system, make sure each of finished product is 100% up to standard. Topone focus on every production flow detail to manufacture high quality product. The essential material vendor assessment and incoming material inspection help us to avoid possible mistake before pre-production. The dual secure method of in-process 100% product check and final random inspection are formed for verifying cargoes quality before shipment.

Service-Maintain stable relationships with new and cooperated customers is the key of Topone success. Our dynamic sales team are ready to create the best value for your business and help you to step ahead in the competitive market with our innovative ideals.

Topone look forward you to joining us!
